HULL PRO

A CERAMICIZED, CLEAR, PERFORMANCE COATING FOR BELOW THE WATERLINE

Armus Hull Pro is the next generation of marine coatings, engineered for superior protection and performance. Designed as a clear, bottom coating, Hull Pro enhances speed, reduces fuel consumption, and provides long-lasting, multi-seasonal durability. Make end-of-season cleaning easier, protect against hull blistering & osmosis, and stop sacrificing performance today!

**SAVE ON COSTLY
GELCOAT REPAIRS**

**IMPROVES
PERFORMANCE**

**ULTRA HARD,
DURABLE COATING**

**PROTECTS AGAINST
HULL OSMOSIS**

**INCREASES
RESELL VALUE**

**USE ON SWIM DECKS,
TRAILER & LIFTS**

PROTECT MORE THAN JUST YOUR HULL

SWIM MOUNTS & METALS

Protect bare metals from rust, corrosion, and impact damage, and make them easier to clean.

DRY DOCKED VESSELS

Prevent your gelcoat from yellowing. Hull Pro won't chip or scratch or slip off bunks or straps.

LOWER UNITS & BRACKETS

Use Hull Pro on your engine saddles, trim tabs, and zip wakes, making them easy to clean!

ARMUS MARINE

HULL PRO WORKS DIFFERENTLY DEPENDING ON WHERE AND HOW YOU BOAT.

**SCAN TO EXPLORE HOW HULL PRO WORKS BASED
ON WHERE AND HOW YOU BOAT.**

FRESHWATER

Hull Pro thrives in freshwater. No anti-fouling paint needed — in fact, copper-based bottom paint is banned on many inland lakes. Low maintenance at the end of the season for optimal fuel savings. Maximum results.

BRACKISH WATER

Brackish conditions vary by tidal flow, and season. Hull Pro performs well with the right maintenance schedule — more than freshwater, less than full saltwater.

SALTWATER

Hull Pro works in saltwater — but regular hull cleaning is required. Best for lift-kept and trailer-kept vessels, and charter boats with a dedicated maintenance crew.

LIFT, TRAILER, OR DRY-RACK

Regardless of water type, lift, trailer-kept, and dry-rack vessels get the best results with Hull Pro. If you pull to store, rinse with freshwater before storage. If you need to reset? A simple power wash and acid wash resets the coating completely — no degradation, no re-coating needed.
