

Maretron Real Time Cloud Service

Maretron Real Time Cloud Service allows you to remotely and seamlessly connect to your vessel using N2KView® or N2KView® Mobile software in order to monitor and control your vessel from anywhere in the world. As long as there is an Internet connection to the vessel, the Maretron Internet Protocol Gateway (IPG100) will automatically log into the Maretron Real Time Cloud Server and the vessel's information will be made available to any device running N2KView® or N2KView® Mobile. Connection between your vessel and remote N2KView® software has never been easier, whether your vessel's Internet connection is via a marina Wi-Fi, satellite connection, GSM or cell phone modem, or any other type of Internet connection, you'll have access to the vessel from anywhere in the world.

Using Maretron Real Time Cloud Service is simple, just imagine receiving an email or text notification from the vessel indicating a problem and you simply log onto the vessel using a smartphone, tablet, or PC. Using the Maretron N2KView® vessel monitoring and control software you'll have a better

understanding of the problem and can even initiate a corrective action like resetting tripped breakers, turning on auxiliary pumps or lights, etc. Or maybe you want to adjust the air conditioner or start the ice maker on your way to the boat. Maretron Real Time Cloud Service provides you with a seamless connection to your vessel for peace of mind and convenient access from anywhere in the world.

PRODUCTS

PART NUMBER	DESCRIPTION
MCS-25GB	Remote Vessel Monitoring & Control Data Plan (1 Year Contract Required-25GB/month)
